LIGHTWEIGHTING TECHNOLOGY SERIES
for small and medium-sized companies

In partnership with:
**MICHIGAN
MANUFACTURING
TECHNOLOGY
CENTER**

INNOVATION...

THE HEART OF MANUFACTURING.

Innovation is at the heart of manufacturing. Often that innovation comes from startups or small companies that have a new idea on how to make something or an innovative process for creating something new.

At LIFT and the Michigan Manufacturing Technology Center, our missions are aligned to support those companies and help their innovations flourish and find a foothold in the marketplace. With that goal in mind, we are proud to announce:

LIFT OFF: A LIGHTWEIGHTING TECHNOLOGY SERIES FOR SMALL AND MEDIUM-SIZED COMPANIES

CURRENT 2017 LIFT OFF SCHEDULE

Each month, on the third Thursday at noon ET, the LIFT Off series will highlight a different small or medium-sized company and the technologies they are developing to support lightweighting.

AUGUST 17

Multi-Material Riveting

Dan Radomski—Optimal Inc.

SEPTEMBER 21

Breakthroughs in Low-Cost ADHSS Heat Treating

Gary Cola—Flash Bainite

FUTURE TOPICS & SPEAKERS:

Multi-Material Friction Stir Welding, *Mike Spodar—Coldwater Machine*

Lightweight Metals Enabling Software, *Ravi Kunju—Altair*

Cryogenic Machining, *Bill Horwarth—5ME*

Morphing Software, *John Gelmisi—DEP*

Smart Virtual Prototyping, *Mark Doroudian—esi*

Lightweight Metallurgy, *Subodh Das—Phinix*

REGISTRATION

To register or for more information on upcoming speakers, visit The-Center.org and search the 'Events' tab. To learn more about becoming a presenter or a member of LIFT, email communications@lift.technology.
