

# Driving Manufacturing Into the Future Through Technology and Talent Development

LIFT is the national manufacturing innovation institute driving American industry into the future where manufacturing technology and talent matter.

A national showcase for smarter manufacturing, we convene government, industry and academia to deliver the top technological innovations and educate the future workforce to support the U.S. defense and industrial manufacturing bases.

## LEADing Innovations for Tomorrow

-  Integrated Computational Materials Engineering (ICME) and Computational Engineering
-  Agile and Smarter Manufacturing
-  Advanced Alloy Process Development
-  Multi-Material Joining

## LEARNing Innovations for Tomorrow

-  IGNITE: Mastering Manufacturing
-  The LIFT Learning Lab
-  World-Class Certification Programs
-  Operation Next

## Solving the Manufacturing Equation

### Materials

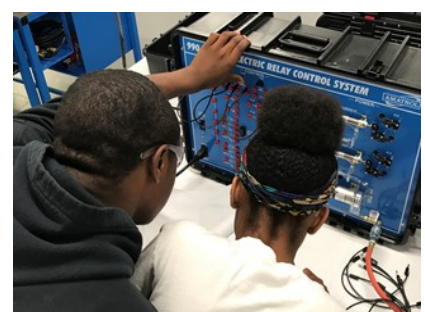

### Process

### Systems

### Talent
